

Thuja p. Green Giant

**BOUNTIFUL
FARMS**

The ***Green Giant Western Red Cedar*** is truly a giant among arborvitae. This green beauty is fast growing, adding up to 5 feet per year. It's tight, pyramidal habit and growth rate make it an ideal choice for a living fence. Also makes a great specimen tree when planted alone. Adapts easily to a variety of soils and is tolerant of drought and winter conditions once established. Birds love it, but deer will leave it alone.
